

# DELAWARE STEM COUNCIL

Daniel Suchenski is the Executive Director of the Governor's STEM Council. Responsible for oversight and management of all day-to-day functions and services, Daniel acts as the focal point for all STEM Council matters; serves as the primary liaison to the Governor's Office, Department of Education, Institutes of Higher Education and businesses to further the mission of the STEM Council. The Council's mission is to:

- Expand the number of Delaware students who ultimately pursue advanced degrees and careers in STEM fields and broaden the participation of women and minorities in these fields.
- Expand the STEM capable workforce to create, grow and attract STEM related businesses to Delaware.
- Increase STEM literacy for all Delaware students including those who pursue non-STEM related careers, but need STEM skills.

A passion for global business, education, and coalition building. He has started several small companies focused on everything from consulting to adaptive reuse. He has several certificates in sustainability, and over the years, has used his expertise to work with numerous non-profit and for-profit stakeholders all over the world.

Daniel speaks Mandarin Chinese, and has conversational proficiency in Spanish. He earned his BA in International Affairs from George Washington University, his MBA in Sustainable Management, an MS in nonprofit leadership from the University of Pennsylvania, and is pursuing a doctorate in business administration.
